

## Hurricane Remediation Products

Industry experts agree: long-lasting remediation of mold and mildew requires a process that will **CLEAN** the surface, **KILL** remaining microscopic organisms and then **CONTROL** future growth. Leave out one of these steps and you leave the surface vulnerable for new mold and mildew growth to take hold. That's why industry best practices indicate a thorough 3-step process. That's why there's new Storm System Mold & Mildew Solutions, best-in-class formulations designed for use by both homeowners and professionals. Please visit [www.stormmoldandmildew.com](http://www.stormmoldandmildew.com) for how to videos.

Apply **Step 1 Clean Hydrogen Peroxide Cleaner** onto effected surface until evenly wet. Allow product to work into the surface and lift matter out through the foaming action (5-10 minutes). Wipe with a damp sponge before surface is dry.

Disinfect surface with **Step 2 Kill Disinfectant & Deodorizer**. Thoroughly wet surface and allow to remain wet for 10 minutes. Let surface air dry.

Choose and apply the appropriate **Step 3 Control** product for your situation.

### **Associa on Call Pricing:**

- Step 1 CAL00471/EA \$32.58
- Step 2 CAL00481/EA \$20.51
- Step 3 CAL00491/EA \$20.99

Pricing Effective Until 12/31/2017
